Cloud Services

We offer top-notch cloud services to help you store, manage, and access your data securely from anywhere, at any time. Our team of experts provides reliable and scalable cloud solutions tailored to your business needs.

Business process outsourcing (BPO)

Boost your business with comprehensive customer support including call center, chat support, and AI bot chat. Our award-winning agents and advanced technology deliver exceptional service. We also offer other key BPO services like back-office operations, data entry, and more.

Cybersecurity solutions

Our solutions provides protection against cyberattacks, which include advanced threat detection, incident response planning, network security, and compliance with industry-leading regulations.

IT Infrastructure Deployment

We specialize in designing and implementing robust IT infrastructures for US businesses, including hardware, software, and network components. Our experts ensure a smooth transition and optimal performance.

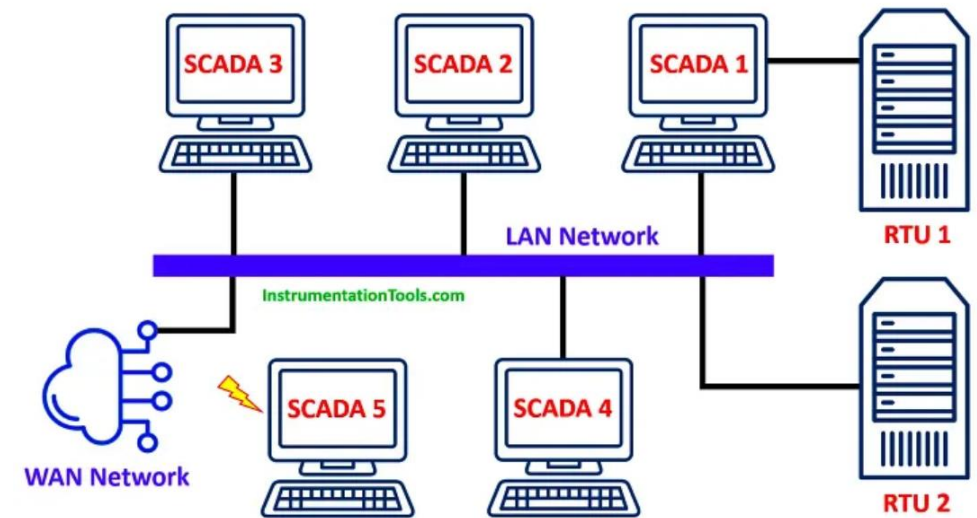

SCADA and EMS Network Configuration

Built a standard configuration of the SCADA/EMS network that can duplicated at all four SDGE battery container Micro-grid sites.

Create a procedure that can be used to implement/load configuration files rather manually configuring the switches one at a time.

Assist with the commissioning of the EMS network including:

- Fortinet configuration
- NTron configuration
- Cisco 350 configuration
